## **Vita**

Daniel Adam Steck was born on April 20, 1973 in Dayton, Ohio to Raymond and Shitsuko Steck. He graduated from Archbishop Alter High School in Kettering, Ohio in 1991, and received the degree of Bachelor of Science in Physics and Mathematics from the University of Dayton in 1995. The following fall, he joined the research group of Mark G. Raizen in the Department of Physics at The University of Texas at Austin to perform research on quantum chaos in optical lattices, which is the subject of this dissertation.
